MODEL 606011991

DESCRIPTION: VB NET 8' ROPE ADAPTER ASSEMBLY

Scope:

The purpose of the 8' Rope Adapter Assembly is to allow GPSS Winch with Hook to connect to GPSS Cable style Volleyball Nets.

Materials:

The finished assembly consists of two parts; the steel 1/4" Snap Link and the 8' x 1/4" diameter Kevlar Rope Adapter which includes a formed C-shaped steel eyelet for easy installation joined together by a stainless-steel crimp sleeve covered with anti-fray cable coating. The crimp sleeve has a breaking strength of approximately 600lbs.

Directions:

The connection is made to the winch with hook by first connecting the snap link to the net cable feeding the rope over the top of the post pulley or roller depending on the system, and down toward the winch. Then, pull the rope taught and tie a simple overhand knot near winch to connect the knot to the hook. Once connected, use the winch crank handle to tighten for proper net tension.

Compatibility:

The 8' Rope Adapter Assembly is compatible with GPSS Cable style Volleyball Net part numbers 601651165 and 601652115 ONLY when using a GPSS Winch with Hook.
