Style B	Style BX	Style C	Style E
Style B anchors are used on wood floors when one layer of wood is directly on concrete.	Style BX anchors are used on wood floor when the floor is over a subfloor directly on concrete.	Style C anchors are used on concrete floors or synthetic floors.	Style E anchors are used on permanent style floating floors.
Style B anchors are also used on portable wood basketball floors such as arena floors that are 3" or more thick for anchoring Gared portable units.			Style E is not recommended for portable floating floors such as arena floors because of the permanent location of the anchor. However, if requested by the customer, the style E could be used on portable arena floors.
