

JAYPRO MODEL PVBN-6

"FLEX-NET INTERNATIONAL" PATENTED CABLE-LESS VOLLEYBALL NET

Net dimensions are 32' long x 39" high with a top cable-less binding of 32'-6". A 2", 10,000 lbs tensile strength white binding surrounds entire perimeter of net body. High tensile strength, hardened steel delta-rings are attached to the top ends to allow connection with upright leader straps or cables. This net is for use on any of the Jaypro volleyball units and meets the requirements set forth by USVBA, NCAA, and National Federation of State High School Associations.

Netting is manufactured from high quality, #21 black thread, knotted nylon, 4" square mesh. Two net dowels at each end consist of ½" EMT steel tubing, which are completely enclosed for safety in side pockets.

Bottom of net has a 2" Velcro net-bottom tensioning strap and metal buckle to allow a very tight bottom net binding on each side. Each buckle is covered with an attached Velcro strap for player safety. Standard overall net length is designed for 36' on center standard spacing (but will accommodate 35' to 37' spacings).

Net is for use with Jaypro volleyball systems only. Volleyball nets with cables for tensioning shall not be considered equal.
