Pickleball Net Assembly Instruction

- Refer to the layout above for positioning of net frame components (middle poles stacked to fit)
1. Slide the square base of an end upright into the top square bracket of an end foot bar
 2. Slide the square end of an end poles into the side square bracket of an end foot bar
 3. Attach a middle pole to the end pole, followed by a second middle pole
 4. Attach the center pole to the second middle pole, then slide the center upright over the center pole
 5. Slide the square base of the center upright onto the square bracket of the center foot bar
 6. Attach a third middle pole to the center pole, followed by the fourth middle pole
 7. Attach the fourth middle pole to the side square bracket of the second end foot bar
 8. Slide the square base of the second end upright into the top square bracket of the second end foot bar
 9. Slide the end pockets of the net over the end uprights
 10. Use the velcro on one end of the net to tension the net, which solidifies the net frame
